

To Whom It May Concern

Hamburg, 03 January 2020

Dear Sirs,

Milagro Interactive Technologies is our trusted and long-term service provider for design and online services. Our professional relationship dates back to 2004.

During the last 16 years, Milagro carried out the following tasks for our group of companies: Three corporate websites (both for B&T and TMN Survey Group), various image brochures and flyers, business card designs, corporate identity, including logo design and much more.

The work was always carried out at competitive rates and in a very professional manner. In particular, I would like to highlight the top-level communication; all correspondence and emails were replied to immediately, and the work was always carried out within the agreed upon time frame.
