

Testimonial for Milagro Interactive Technologies

28th February, 2007

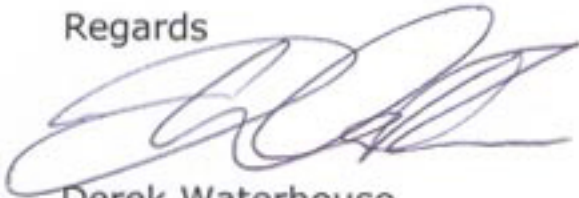

Inner Media Solutions (IMS) provides premium media solutions to corporate and medium sized businesses within the UK, to enhance their service offerings or marketing campaigns.

Over the past 18 months IMS has been worked closely with Milagro Interactive Technologies (Milagro) to deliver these, using Milagro exclusively to provide design and development content.

This has covered 3D modelling for architectural Clients, website design & development and production of print materials for corporate communications.

We rely on the output of Milagro, being our main vendor through our offshore arrangements. This has been an invaluable part of our ability to service our Clients, and has been dependent on the strong relationship developed between the two organisations. This ongoing relationship is fundamental to the success of IMS.
